WORK EXPERIENCES

Associate Software Engineer | Internship

Jan 2026 - Present

Coditas Solutions LLP

On-site • Viman Nagar, Pune

- Engineered and **maintained RESTful backend services** using **FastAPI**, supporting **distributed systems** for user, authentication, and business workflows.
- Established **JWT-based authentication** and **role-based access control**, enabling secure Admin and user-level operations across 3 permission tiers.
- Architected and managed relational database schemas using **SQLAlchemy**, with version-controlled migrations via Alembic, supporting 5+ core data models.
- Built a **modular backend architecture** with routers, services, and repository layers, reducing code understanding time by nearly 60% and improving team onboarding speed.
- Strengthened API reliability by integrating **request validation**, **structured logging**, and **robust exception handling**, reducing bug turnaround time by ~40%.

Technologies / Skills Used : FastAPI, SQLAlchemy, Alembic, JWT, Poetry, distributed systems, Agile, automated testing

PROJECTS

CertivaX : Certification & Licensure Management Platform | 🌐 Github

May 2026 - Jun 2026

Individual Project

- Developed a scalable certification management platform using FastAPI and clean architecture, enabling secure certification workflows, user management, and verification pipelines.
- Integrated AWS S3, JWT authentication, SQLAlchemy ORM, Alembic, and Pydantic to enable secure certificate storage, structured persistence, and production-grade API security.

Technologies / Tools Used : Python, FastAPI, SQLAlchemy ORM, PostgreSQL, JWT, AWS S3, Alembic, Pydantic

LeagueForge: Tournament Management System | 🌐 Github

Apr 2026 - Apr 2026

Individual Project

- Architected a rule-driven league tournament platform with a **constraint-based double round-robin scheduler** optimizing rest gaps, venue availability, and conflict-free fixtures for up to **16 teams** using a **5-layer clean architecture**.
- Built** a dynamic standings and match management engine using **FastAPI**, **SQLAlchemy ORM**, **Alembic**, and **Pydantic**, enabling automatic ranking updates, structured persistence across core entities (Team, Match, Venue, League), and strict request validation for reliable API operations.

Technologies / Tools Used : Python, FastAPI, SQLAlchemy, Pydantic, Alembic

SERVORA – Restaurant Order Management API | 🌐 Github

Mar 2026 - Apr 2026

Individual Project

- Developed** a scalable restaurant order management system using **FastAPI**, implementing **modular backend architecture** for managing users, restaurants, menus, and orders across **6 core database models** with optimized API design and maintainable code structure.
- Implemented JWT-based authentication** and **Role-Based Access Control (RBAC)** for Admin, Restaurant Owner, and Customer roles; integrated **SQLAlchemy ORM**, **Pydantic validation**, and **Alembic migrations** to ensure secure authorization, structured data persistence, and scalable database management.

Technologies / Tools Used : FastAPI, PostgreSQL, SQLAlchemy, Alembic

SKILLS

Databases :	MySQL, PostgreSQL
Frameworks & Libraries :	FastAPI, SQLAlchemy, Alembic
Languages :	English, Hindi, Marathi
Programming Languages :	Python, C++
Others :	Object-Oriented Programming (OOP), Database Management Systems (DBMS)
Tools & Platforms :	Git, GitHub, Postman, DBeaver, RabbitMQ, Visual Studio Debugger, GitLab, Jira

EDUCATIONS

Ajeenkya D Y Patil University | Pune

Aug 2022 - May 2026

Bachelor of Technology in Artificial Intelligence and Data Science

CGPA : 8.80
